A woman with long dark hair, wearing dark sunglasses and a red and black plaid shirt, is smiling. She is positioned in the foreground, slightly to the right. The background is a blurred city skyline with several tall buildings. The overall image has a warm, slightly hazy aesthetic. The text "AN EDUCATION BEYOND BORDERS" is overlaid on the left side of the image.

Clinical Experience

Clinical Experience at Bau International University Batumi starts from the very first year of education with the clinical visits to the hospitals and continued with the clinical Rotations and Internship.

Clinical Visits - Year 1.2.

Clinical Rotations - Year 3.4.5

Internship - Year 6.

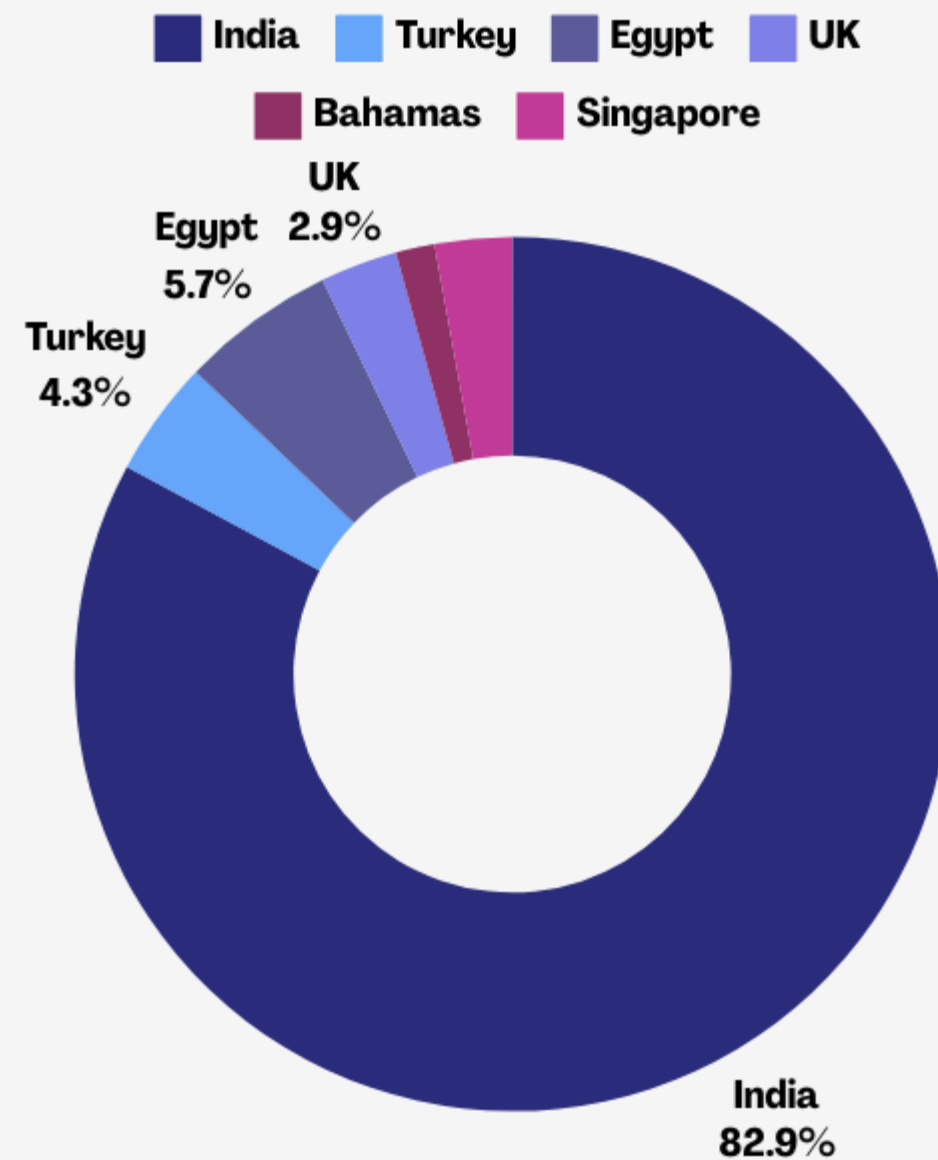

Cadaver LABORATORY

The only Cadaver lab in Georgia which provides medical students with the opportunity to perform dissection on human cadavers.

The Cadaver Lab offers an invaluable hands-on learning experience, allowing students to study Human anatomy in detail and gain a deeper understanding of the complexities of human body.

Scholarships

Students can earn funding after enrollment in the university based on their academic performance at the end of the semester, in particular, if the GPA indicator is 3.8 and higher after the end of the semester they are eligible for 50% funding

Free FMGE and USMLE Classes

United States Medical Licensing Examination - USMLE is a obligatory examination for medical graduates looking to practice medicine in the United States.

Foreign Medical Graduates Examination - FMGE is a crucial step for foreign medical graduates aspiring to practice in India.

Effective preparation is key to success.

Integrated CURRICULUM

- Cell, tissue, organ systems
- Musculoskeletal System
- Cardiovascular System
- Nervous System
- Communication Skills and Academic Reporting

Traditional CURRICULUM

- Human Anatomy
- Medical Chemistry
- Medical Biology
- Histology, Cytology
- Latin Language and medical terminology

	Traditional	Integrated
Patient contact starts	In clinical years. Pre-clinical years vary from 2-3 years in length	As early as year 1
Teaching style	Lecture based in pre-clinical years, followed by clinical years with discussion based classes	Systems-based teaching, often using a spiral curriculum so you develop your understanding of each system with each year of study
Benefit to this style	You have a good base scientific knowledge before you begin your clinical learning	You get early patient contact and develop your clinical skills from early on in your learning

Description of program:

- 5 Year (55 Month) integrated Theory, Simulation and Clinical Study
- 1 Year (12 Month) internship in final Year
